⁽¹⁾ Investments classified as Level 3 within the three-tier fair value hierarchy. See *Note 2, Summary of Significant Accounting Policies- Fair Value Measurement* for an explanation of this hierarchy, as well as a list of significant unobservable inputs used in the valuation of these instruments.

⁽²⁾ Non-income producing investment.

⁽³⁾ Restricted security. The aggregate value of restricted securities at December 31, 2025 is approximately \$358,999 (*amount in thousands*) and represents approximately 82.0% of net assets. See *Note 2, Summary of Significant Accounting Policies* for additional information.

⁽⁴⁾ Shares held through a special purpose vehicle of which the named investment is the sole investment. If applicable, shares listed indicate shares of underlying investment.

⁽⁵⁾ Shares held through 8VC ANSE SPV, LP of which Anduril Industries, Inc. is the sole investment.

⁽⁶⁾ If there is an equity financing, this Simple Agreement for Future Equity ("SAFE") will convert into preferred shares equal to the Fund's cost of investment divided by conversion price, which is a function of the discount price.

⁽⁷⁾ AI-LLM, LLC holds an investment in a leading private North American-based artificial intelligence and large language model provider (leading defined as top 10 in capital raised as of the reporting date among North American-based companies primarily focused on building and serving foundation models).

⁽⁸⁾ Value is less than 0.05% of Total Net Assets.

⁽⁹⁾ Investment valued using net asset value per share (or its equivalent) as a practical expedient. See *Note 2, Summary of Significant Accounting Policies - Fair Value Measurement* for additional information.

⁽¹⁰⁾ As of December 31, 2025, dbt Labs, Inc. had announced a proposed merger with Fivetran Inc. that had not yet closed.

⁽¹¹⁾ Investment in an affiliate. See *Note 2, Summary of Significant Accounting Policies* for additional information.

⁽¹²⁾ If there is an equity financing, this SAFE will convert into preferred shares equal to the Fund's cost of investment divided by conversion price where the conversion price means either: (1) the SAFE price or (2) the discount price, whichever calculation results in a greater number of shares of SAFE preferred stock.

⁽¹³⁾ Limited partnership with a 10-year term. Redemptions are not permitted. There are unfunded commitments of \$704 (*amount in thousands*) as of December 31, 2025.

See accompanying notes to schedule of investments.

1. Formation and Organization

Fundrise Growth Tech Fund, LLC (the “Fund” or the “Registrant”) is a Delaware limited liability company. The Fund intends to elect and intends to qualify to be taxed as a regulated investment company (“RIC”) under the Internal Revenue Code of 1986, as amended (the “Code”), for its taxable year ending March 31, 2026. During prior taxable years, the Fund was taxed as a C corporation for U.S. federal income tax purposes. The Fund is organized as a continuously offered, non-diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”). The Fund’s registration statement was declared effective on May 11, 2022. The Fund commenced investment operations on July 25, 2022.

The Fund’s investment objective is to provide total return primarily through long-term capital appreciation. The Fund seeks to achieve its investment objective by investing in private and public technology companies, directly or indirectly, with a primary focus on the equity securities (e.g., common stock, preferred stock, and convertible debt) of certain privately held, mid-to-late stage, growth companies (“Portfolio Companies”), or other investments (including derivatives, exchange-traded funds and other pooled investment vehicles) that have economic characteristics similar to investments in technology companies. Under normal circumstances, the Fund’s investment strategy is to invest at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in the securities of technology and technology-related companies (referred to herein as “technology companies”) and other investments (including derivatives) that have economic characteristics similar to investments in technology companies.

The investment adviser to the Fund is Fundrise Advisors, LLC (the “Adviser”), an investment adviser registered with the U.S. Securities and Exchange Commission (“SEC”) under the Investment Advisers Act of 1940, as amended. The Adviser is a wholly-owned subsidiary of Rise Companies Corp. (“Rise Companies” or the “Sponsor”), the Fund’s sponsor. Subject to the supervision of the Board of Directors of the Fund (the “Board”), the Adviser is responsible for directing the management of the Fund’s business and affairs, managing the Fund’s day-to-day affairs, and implementing the Fund’s investment strategy.

2. Summary of Significant Accounting Policies

Valuation Oversight

Pursuant to SEC Rule 2a-5 under the 1940 Act, the Board has approved the Adviser as the Fund’s Valuation Designee (“Valuation Designee”), to provide administration and oversight of the Fund’s valuation policies and procedures. The Fund values its investments in accordance with such procedures. Generally, portfolio securities and other assets for which market quotations are readily available are valued at market value, which is ordinarily determined on the basis of official closing prices or the last reported sales prices. If market quotations are not readily available or are deemed unreliable, the Fund will use the fair value of the securities or other assets as determined by the Adviser in good faith, taking into consideration all available information and other factors that the Adviser deems pertinent, in each case subject to the overall supervision and responsibility of the Board.

In calculating the Fund’s net asset value (“NAV”), the Adviser, subject to the oversight of the Board, uses various valuation methodologies. To the extent practicable, the Adviser generally endeavors to maximize the use of observable inputs and minimize the use of unobservable inputs by requiring that the most observable inputs are to be used when available. The availability of valuation techniques and observable inputs can vary from investment to investment and are affected by a wide variety of factors. When valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment, and may involve alternative methods to obtain fair values where market prices or market-based valuations are not readily available. As a result, the Adviser may exercise a higher degree of judgment in determining fair value for certain securities or other assets.

Fair Value Measurement

The following is a current summary of certain methods generally used to value investments of the Fund under the Fund’s valuation procedures:

The Fund applies Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 820, Fair Value Measurement, as amended, which establishes a framework for measuring fair value in accordance with accounting principles generally accepted in the United States (“U.S. GAAP”) and required disclosures of fair value measurement. U.S. GAAP defines

FUNDRISE GROWTH TECH FUND, LLC
NOTES TO SCHEDULE OF INVESTMENTS (UNAUDITED)(CONTINUED)
DECEMBER 31, 2025

the fair value as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date.

The Fund determines the fair value of certain investments in accordance with the fair value hierarchy that requires an entity to maximize the use of observable inputs. The fair value hierarchy includes the following three levels based on the objectivity of the inputs, which were used for categorizing the assets or liabilities for which fair value is being measured and reported:

Level 1 – Quoted market prices in active markets for identical assets or liabilities.

Level 2 – Significant other observable inputs (e.g., quoted prices for similar items in active markets, quoted prices for identical or similar items in markets that are not active, inputs other than quoted prices that are observable such as interest rate and yield curves, and market-corroborated inputs).

Level 3 – Valuation generated from model-based techniques that use inputs that are significant and unobservable in the market. These unobservable assumptions reflect estimates of inputs that market participants would use in pricing the asset or liability. Valuation techniques may include use of discounted cash flow methodologies or similar techniques, which incorporate management's own estimates of assumptions that market participants would use in pricing the instrument or other valuation assumptions that require significant management judgment or estimation.

Fixed income securities are valued by an independent pricing service overseen by the Valuation Designee. The pricing service employs a pricing model that takes into account, among other things, bids, yield spreads and/or other market data and specific security characteristics. In the event prices or quotations are not readily available or that the application of these valuation methods results in a price for an investment that is deemed to be not representative of the fair value of such investment, fair value will be determined in good faith by the Valuation Designee, in accordance with the valuation policy and procedures approved by the Board. These securities are generally classified in Level 2 of the fair value hierarchy.

Investments in registered investment companies, including money market funds, are valued at the NAV as of the close of each business day. These securities are generally classified in Level 1 of the fair value hierarchy.

Based on the short-term nature of the borrowings under the reverse repurchase agreements, the carrying value of the payable for reverse repurchase agreements approximated its fair value as of December 31, 2025. These reverse repurchase agreements are generally classified in Level 2 of the fair value hierarchy.

The majority of the Fund's investments have no readily available market quotations and, as such, are valued at fair value in good faith. There is no single standard for determining the fair value of a security. Rather, fair value calculations will involve significant professional judgment in the application of both observable and unobservable attributes. For mid-to-late stage growth Portfolio Companies, traditional valuation methods (e.g., discounted cash flow) are often a less reliable tool for valuing investments in accordance with ASC 820. As such, until the Portfolio Companies grow to a point where traditional valuation methods apply, the Fund may deem it more appropriate to utilize other valuation methodologies. Late-stage private companies or "pre-IPO companies" traditionally raise capital from investors in organized funding rounds. During such funding rounds, a pre-IPO company will seek a lead investor who will, to their best effort, define a valuation of the company. Therefore, the valuation of the Fund's Portfolio Companies may be adjusted when a new valuation is set by the lead investor in the next funding round. As such, the Fund may use the market approach to estimate the fair value of its Portfolio Companies by adjusting the valuation of its Portfolio Companies with each new funding round. However, while the valuation as of the latest funding round is a prominent factor in the Fund's valuation process, it is not the only factor that the Fund considers when valuing its portfolio investments.

The Fund may establish certain thresholds or triggers that intend to capture fundamental changes in the value of the Portfolio Company that would affect the anticipated return on the Fund's investment. Examples of certain thresholds or triggers may include, an unexpected business or technology breakthrough, faster than anticipated revenue growth, a fundamental failure of the technology, the loss of a key customer, or the success of a competitor in the same industry. Additionally, the Adviser may consider several additional factors (if present), including but not limited to the implied valuation of the asset as reflected by stock purchase contracts reported in private markets, fundamental analytical data relating to the investment in the security, the nature and duration of any restriction on the disposition of the security, the cost of the security at the date of purchase, or the liquidity of the market for the

FUNDRISE GROWTH TECH FUND, LLC
NOTES TO SCHEDULE OF INVESTMENTS (UNAUDITED)(CONTINUED)
DECEMBER 31, 2025

security. The Adviser may also consider periodic financial statements (audited and unaudited) or other information provided by the Portfolio Companies to investors or prospective investors, to the extent that it is available.

The Fund invests in Portfolio Companies by purchasing securities directly from such Portfolio Companies, through simple agreements for future equity (“SAFEs”), or through special purpose vehicles (“SPV”). SAFEs represent a contractual right to future equity of a company, in exchange for which the holder of the SAFE contributes capital to the company. SAFEs enable investors to convert their investment to equity upon the occurrence of triggering events set forth in the applicable SAFE.

For investments in companies that are not considered “pre-IPO companies”, valuation methods utilized may include, but are not limited to the following: sales comparison approach; discounted cash flow method; hypothetical sales method; and appraisals received from one or more pricing services. In addition, the Fund may utilize: an analysis of financial ratios and valuation metrics of the Portfolio Companies that issued private equity securities to peer companies that are public; an analysis of the Portfolio Companies’ most recent financial statements and forecasts; an analysis of the markets in which the Portfolio Company does business; and other relevant factors.

Portfolio Funds and certain Portfolio Companies are generally valued based on the latest NAV reported by the Portfolio Fund or Portfolio Company's portfolio manager (“Portfolio Manager”) as a practical expedient, where such valuation methodologies employed by the Portfolio Funds and certain Portfolio Companies reflects fair value pricing and the effects of using fair value pricing. New purchases of Portfolio Funds and certain Portfolio Companies may be valued at original transaction price initially until a NAV is provided by the Portfolio Manager. If the Valuation Committee concludes in good faith that the latest NAV reported by a Portfolio Manager does not represent fair value (e.g., there is more current information regarding a portfolio asset which significantly changes its fair value), the Valuation Committee will make a corresponding adjustment to reflect the current fair value of such asset within such Portfolio Fund or Company. Attributes of those investments include the investment strategies of the investees and may also include, but are not limited to, restrictions on the investor’s ability to redeem its investments at the measurement date and any unfunded commitments. Because of the inherent uncertainty in valuation, the estimated values may differ from the values that would have been used had a ready market for the securities existed, and the differences could be material.

Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of the Fund’s investments may differ significantly from the values that would have been used had a readily available market value existed for such investments, and the differences could be material.

The following is a summary of the Fund’s assets and liabilities measured at fair value on a recurring basis as of December 31, 2025, and indicates the fair value hierarchy of the inputs utilized by the Fund to determine such fair value (*amounts in thousands*):

Assets	Level 1	Level 2	Level 3	Practical Expedient⁽¹⁾	Total
Portfolio Companies	\$ —	\$ —	\$ 281,933	\$ 72,569	\$ 354,502
Common Stock in Public Company	12,694	—	—	—	12,694
Portfolio Fund	—	—	—	4,497	4,497
Commercial Mortgage-Backed Securities	—	66,440	—	—	66,440
Short-Term Investment	26,584	—	—	—	26,584
Total Assets	\$ 39,278	\$ 66,440	\$ 281,933	\$ 77,066	\$ 464,717
Liabilities	Level 1	Level 2	Level 3	Practical Expedient⁽¹⁾	Total
Reverse Repurchase Agreements	\$ —	\$ (15,360)	\$ —	\$ —	\$ (15,360)
Total Liabilities	\$ —	\$ (15,360)	\$ —	\$ —	\$ (15,360)

(1) As a practical expedient, certain investments that are measured at fair value using the NAV per share (or its equivalent) have not been categorized in the fair value hierarchy. The fair value amounts presented in this table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the Schedule of Investments.

FUNDRISE GROWTH TECH FUND, LLC
NOTES TO SCHEDULE OF INVESTMENTS (UNAUDITED)(CONTINUED)
DECEMBER 31, 2025

The Fund utilizes the NAV as a practical expedient to value certain investments. The table below sets forth those investments, including their unfunded commitments and other attributes, that were significant as of December 31, 2025⁽¹⁾.

Investment Category	Investment Strategy	Fair Value (amounts in thousands)	Unfunded Commitments (amounts in thousands)	Estimated Remaining Life	Redemption Frequency	Redemption Notice Period (In Days)	Redemption Restriction Terms
Portfolio Company	To serve as a fund through which the assets of its partners may be utilized to make indirect investment(s) in the securities of Databricks, Inc.	\$ 72,569	N/A	Indefinite	None	N/A	N/A
Portfolio Fund	Venture capital investments in equity or equity-oriented securities of technology and technology-related companies	\$ 4,497	\$ 704	1 to 8 years	None	N/A	N/A

- (1) The information summarized in the table above represents the general terms for the specified financing stage. Individual investment funds may have terms that are more or less restrictive than those terms indicated for the asset class as a whole. In addition, most portfolio funds have the flexibility, as provided for in their constituent documents, to modify and waive such terms.

The following is a summary of quantitative information about the significant unobservable inputs of the Fund's Level 3 investments as of December 31, 2025 (*amounts in thousands*). The tables are not intended to be all-inclusive but instead capture the significant unobservable inputs relevant to the Fund's determination of fair value.

Investment	Fair Value	Valuation Technique⁽¹⁾	Unobservable Input	Range	Impact to Valuation from an Increase in Input⁽²⁾
Portfolio Companies	\$ 183,773	Market Transaction	Transaction Price	N/A	Increase
Portfolio Companies	98,160	Recent Transaction	Transaction Price	N/A	Increase
Total Investments	\$ 281,933				

- (1) Recent transaction represents investments held at the original transaction price, either from the Portfolio Company's funding round or a secondary seller, and other relevant market data. Market transaction represents investments valued using private transaction prices or non-public third-party pricing information which is unobservable.
- (2) Represents the expected directional change in the fair value of the Level 3 investments that would result from an increase in the corresponding input. A decrease to the unobservable input would have the opposite effect. Significant changes in these inputs could result in significantly higher or lower fair value measurements.

The following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value (*amounts in thousands*):

	Balance as of March 31, 2025	Purchases or Conversions	Realized Gain (Loss)	Net Change in Unrealized Appreciation/ Depreciation	Sales or Conversions	Transfers to (from) Level 3	Balance as of December 31, 2025	Net Change in Unrealized Appreciation/ Depreciation for the Period Ended December 31, 2025 related to Level 3 Investments Held at December 31, 2025
Portfolio Companies	\$ 119,573	\$ 90,603 ⁽¹⁾	\$ —	\$ 72,255 ⁽¹⁾	\$ (498) ⁽¹⁾	\$ —	\$ 281,933	\$ 72,255

- (1) Amounts include \$498 SAFEs in Portfolio Companies converted to \$660 in equity investments in Portfolio Companies (*amounts in thousands*).

Restricted Investments

The Fund may purchase securities for which there is a limited trading market or which are subject to restrictions on resale to the public. Restricted securities and securities for which there is a limited trading market may be significantly more difficult to

value due to the unavailability of reliable market quotations for such securities, and investment in such securities may have an adverse impact on NAV. In addition, the Fund's investments in Portfolio Companies will often be subject to lock-up provisions that prohibit the Fund from selling its equity investments into the public market for specified periods of time after IPOs of the Portfolio Company, typically 180 days. The Fund may purchase Rule 144A securities for which there may be a secondary market of qualified institutional buyers as contemplated by Rule 144A under the Securities Act. Rule 144A provides an exemption from the registration requirements of the Securities Act for the resale of certain restricted securities to qualified institutional buyers. The following are the restricted investments held by the Fund as of December 31, 2025 (*amounts in thousands*):

FUNDRISE GROWTH TECH FUND, LLC
NOTES TO SCHEDULE OF INVESTMENTS (UNAUDITED)(CONTINUED)
DECEMBER 31, 2025

Affiliated Investments

The Fund invests in one or more affiliated entities. The affiliated investment vehicles have not been registered under the Securities Act of 1933, as amended, and thus are subject to restrictions on resale.

During the period ended December 31, 2025, investments in affiliates were as follows (*amounts in thousands*):

Non-Controlled Affiliated Investment							
	Balance as of March 31, 2025	Purchases at Cost	Proceeds from Sales	Net Realized Gain (Loss) and Capital Gain Distributions	Change in Unrealized Appreciation/ Depreciation	Balance as of December 31, 2025	Total Dividend Income
Technology Private Equity							
Inspectify, Inc.	\$ 5,000	\$ 1,000 ⁽¹⁾	\$ —	\$ —	\$ —	\$ 6,000 ⁽¹⁾	\$ —
Total	\$ 5,000	\$ 1,000	\$ —	\$ —	\$ —	\$ 6,000	\$ —

⁽¹⁾ Amount includes a \$1,000 SAFE in Inspectify, Inc. which has not yet converted into an equity investment as of December 31, 2025 (*amount in thousands*).

Reverse Repurchase Agreements

The Fund may use leverage to provide additional funds to support its investment activities. The Fund may enter into reverse repurchase agreements from a bank or dealer at a specified maturity date, under which the Fund will effectively pledge its assets as collateral to secure a short-term loan. Generally, the other party to the agreement makes the loan in an amount equal to a percentage of the market value of the pledged collateral. At the maturity of the reverse repurchase agreement, the Fund will be required to repay the loan and correspondingly receive back its collateral. While used as collateral, the assets continue to pay principal and interest which are for the benefit of the Fund.

3. Subsequent Events

Subsequent to the period end, the Fund changed its name to Fundrise Innovation Fund, LLC, effective January 20, 2026.

On March 1, 2026, the Fund sold its investment in Theory Ventures, LP.
